SUMMARY

As a backend software engineer, I seek an entry-level role where I can collaborate with teams. I bring strong communication skills and passion to utilize technical skills to solve challenging problems and industrial difficulties.

WORK EXPERIENCE

Job Title: Backend developer

I built a Calculator that performs very complex arithmetic using expressJs for the backend and HTML, CSS, and js for the Frontend, the calculator can perform simple calculations like addition, subtraction, division, and multiplication to more complex ones like trigonometry, logarithms, and number base system conversions and exponentiation

Developed a working database for a website where commodities, like furniture, basic amenities like availability of electricity and wifi network data are stored

Engineered the DevOps part of the app, by hosting the app on a cloud server, subscribing and connecting to a domain provided, and forwarding user requests using a reverse proxy technology (Nginx)
